| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | |

DETAILED ACTION

Claim Objections

1. Claims 1-19 are objected to because of the following informalities:

Claim 1, line 3: "an input signal" is suggested changing to "the oversampled signal".

Claim 3 & Claim 7, line 1: "a width" is suggested changing to "the width".

Claim 10, line 2: "scale" is suggested changing to "variable scale"; and "width" is suggested changing to "the width".

Claim 11, line 1: "over-sampled" is suggested changing to "oversampled".

Claim 12, line 1: "application of" is suggested changing to "the apply".

Claim 14, line 1: "said first shaping" is suggested changing to "said variable width first shaping".

Claims 2, 4-6, 8-9, 13 and 15-19 are directly or indirectly dependent on objected claims 1 and 11.

Appropriate corrections are required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 20-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in

Art Unit: 2637

the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 20 line 16, "a variable scale cancellation signal subsequent to application of said first shape modifier" does not described in the specification and the disclosure of the figure 13.

Claims 21 and 22 are dependent on the rejected claim 20.

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 1-19, and 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 8 "said first shaping response width" and Claim 4, line 1 "said first shaping response variable width" do not clearly indicated that they are the same variable width of said first shaping response recited in lines 6-7 or different.

Claim 11, line 6: "said first peak" lacks antecedent basis.

Claim 12, line 2: "said first peak portion results" lacks antecedent basis.

Claim 19, lines 1-2: "said second shaping response variable width" lacks antecedent basis.

Claim 21, line 1: "said detector" lacks antecedent basis.

Claim 22, lines 2-3 & line 4: "said estimated first peak portion width" and lines 4-5: "said scale of said cancellation signal" lack antecedent bases.

Art Unit: 2637

Claims 2-3, 5-10 and 13-18 are directly or indirectly dependent on rejected claims 1 and 11.

Allowable Subject Matter

- 6. Claims 1-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 7. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest, alone or in a combination, among other things, at least a system, an apparatus and its method, for peak-to-average reduction of an oversampled signal as a whole, the combination of elements and features, which includes determining a width of the peak portion of the oversampled signal that exceeds a predetermined threshold; applying a shaping response with the variable width responsive to the width of the peak portion to the peak portion.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edith M Chang whose telephone number is 571-272-3041. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jayanti Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
